

Yes

Basin Faucet 6875-90-80CP

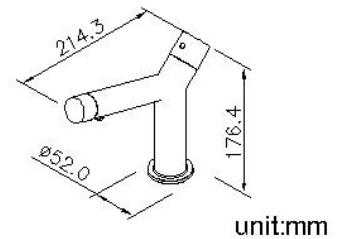

INTRODUCTION:

Brief lines and geometric cylinder simplify the shape and present absolute image of YES Basin Faucet. Considering environmental friendly, this faucet has been designed to save time on temperature adjustment and water saving during the adjusting time. The YES basin faucet uses the clean lines of the letter Y and a geometric cylinder to form a line and a circle by a perfect proportion. The basin faucet body forms a 120-degree angle with the handle and the water outlet, and the handle slightly tilts upwards for easier operation by the user.

DESCRIPTION:

1. Anticorrosive surface treatment of copper products, easy to clean and maintain.
2. Ceramic cartridge passed 500,000 life cycle test.
3. The user can adjust the suitable temperature according to his own habits. Once it is fixed, only the water volume switch needs to be adjusted, and the temperature does not require the adjustment again.
4. Set the water outlet and switch at the bottom of the faucet so as to let every drop of water on the hand and on the water outlet fall into the basin without splashing to the faucet or the countertop.
