

Basin and Sensor Faucet Combination (Cold Only) 6926-U7-80MA

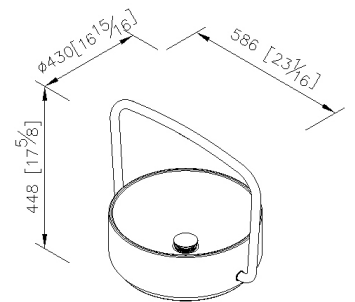

INTRODUCTION:

Chapter Basin Set is a creative design combines basin and faucet together by inspiration of water supply. Pure white basin is like a well has been designed with faucet to get water like windlass. Water will be drawn out under basin and flow out from upper pipe to perfectly represent the image of windlass. Contemporary lines and sensor valve provide a brief appearance and increase the value of product.

DESCRIPTION:

1. Material of spout is brass with black coating and can resist corrosion and tarnish.
2. Basin material: artificial stone makes it easy to clean.
3. Sensor faucet keeps bacteria away from the outlet and offers clean water.
